Dentures or Partial Dentures are considered a professional service and are an artificial substitute for natural teeth. There are no guarantees or refunds. Even the best denture is only 30% as efficient as healthy natural teeth for chewing. The following complications are possible whenever any surgery is performed in the mouth: pain, swelling, bruising, infection, dry socket, broken tooth roots (small root fragments may require additional surgery to remove or may be left in your mouth), numbness following surgery, sinus exposure, damage to adjacent teeth and allergic reactions to anesthesia. Symptoms may not be relieved and additional treatment may be necessary. If you are having serious problems following surgery such as excessive bleeding, swelling or fever consult a medical doctor and call our office for a follow up appointment. Any denture or partial denture made within a year after tooth extractions is temporary. You will need a new denture or partial denture made after your gums heal. We will not disclose any health information about you to anyone without your written consent except as noted in our privacy policy, which is posted next to the check in window, on our website (dynamic-dentistry.com) and is available upon request.

I have read and understand all of the terms and conditions set forth above. **Signature:** \_\_\_\_\_
